

# NCR APTRA™ Interactive Teller

Your branch network is the human face of your brand. For many customers, it is still their preferred method of reaching the many products and services you offer. With 80% of product sales still being closed at the branch, it is more important than ever that you offer an excellent customer experience.

## Putting **PROFITABLE, RELATIONSHIP BANKING** First and Foremost

Have you ever wished that you could replicate and deliver the personalized experience of the branch when, where and how your customer wants to bank? NCR APTRA Interactive teller lets you do just that.

Through the ATM, customers have the choice of full self-service or connecting to a live, centralized teller for a personalized, high quality, two-way video/audio interaction. Using unique technology which allows the teller to remotely drive the ATM transaction for the customer in real-time, the solution supports regular banking transactions, but also lets customers discuss additional financial needs, whenever and wherever they wish.

Ultimately, it means you can efficiently and immediately deploy tellers as you see fit, bringing you a new level of economy and flexibility in how you extend your brand's footprint.

# NCR APTRA™ Interactive Teller

Give your customers a **HIGHLY PERSONAL BANKING EXPERIENCE** anywhere, anytime

NCR APTRA Interactive Teller allows banks to offer their customers the benefits of both self-service and the branch experience in one solution, closing the “intimacy gap.” NCR APTRA Interactive Teller combines video collaboration and remote transaction processing technology embedded within the ATM to give your customer the choice of self-service or connecting with a remote teller in a highly personalized, two-way audio/video interaction.

## **Migrate transactions to a lower cost channel and increase teller line productivity**

Using NCR APTRA Interactive Teller to support migration of routine transactions away from the teller counter to an ATM gives you the combined benefits of lower processing costs and faster transactions.

A centralized teller can be redeployed to concentrate on service and sales, reducing the need for underused teller resource in branch and ensuring maximum productivity levels are achieved.

## **Deliver highly personalized and convenient customer service**

Give your customers the ability to choose live face-to-face support for transacting at the ATM, as well as discussing other services and products. An easily monitored, centralized teller resource ensures consistently high service levels, wherever you choose to locate NCR APTRA Interactive Teller.

## **Enable increased product sales and revenue growth**

NCR APTRA Interactive Teller enables an extended footprint and greater reach to engage with your customer on how relevant financial services solutions will support them in managing their life events, resulting in increased product sales and revenue growth.

## **Key Features:**

- Supports migration of teller transactions to self-service
- Automates or supports personal teller services up to 24x7
- Can be located in both traditional and non-traditional locations
- Lowers cost of teller transactions and increases teller productivity by centralizing your teller
- Offers one-to-one personal service to consumers in a more cost-effective way
