

NCR Certified Refurbished ATMs

Looking for a quality assured low-cost refurbishment solution?

YES

Proven stable technology

For more than 22 years NCR has been the global leader in the design, manufacture and support of ATMs. During that time NCR has continually delivered products that help improve customer service while reducing operational costs. As part of this commitment to service and value NCR offers a Certified Refurbished ATM program, giving customers the opportunity to benefit from NCR's trademark high quality solutions for branch and off-premise cash dispensing at a significantly lower cost.

- **A trusted low-cost alternative**

An NCR Certified Refurbished ATM is a reconditioned NCR ATM that has undergone a comprehensive assessment, repair, replacement, upgrade and test procedure. NCR Certified Refurbished ATMs leverage the strength and stability of NCR's proven technology to provide a low-cost, high functionality alternative to new ATMs.

- **Dependable refurbishment options**

Refurbishment is carried out at a select group of NCR authorized service facilities using only genuine NCR spare parts giving you confidence that these ATMs will deliver the same exceptional reliability as a brand new unit. NCR's refurbishment program covers walk-up and drive-up ATMs for both lobby and through-the-wall locations.

- **Services support you can rely on**

NCR Certified Refurbished ATMs are fully supported by NCR's comprehensive global service network. NCR's unrivalled expertise in manufacturing world class ATMs means a reconditioned ATM is a cost-effective way of expanding a self-service channel.

- **Full compliance with current standards**

Every NCR Certified Refurbished ATM is upgraded to comply with current standards/compliance for real peace of mind as well as the added flexibility of customizable options. Enhancements include the PCI compliant NCR Encrypting PIN Pad (EPP) that satisfies all applicable ANSI and ISO standards, and the Triple DES/EPP-ready processor.
